

Zephyr Chandelier - 3000K - Bronze

Carlo Colombo

IP20    Dimmerable: 

LUMINAIRE

- Watt: **175W**
- Delivered lumen output: **12735lm**
- CCT: **3000K**
- Efficiency: **52%**
- Efficacy: **72.77lm/W**
- CRI: **90**
- Dimmable Typology: **Push/DALI**

Notes

Code referring only to the body lamp, to be completed with the rose code according to the type of lighting management required.

DESCRIPTION

Zephyr is a minimalist and elegant chandelier, available in different configurations designed to respond with balance and restraint to a variety of design requirements.

The structure consists of double cylindrical diffusers with a central body that houses the light sources. Two rings, rotating on the same axis, define the orientation of the lighting bodies and the structural connecting elements.

The diffuser is made of transparent glass, hand-blown into a wave-shaped mould; its peaks are then ground to create a horizontal texture that alternates transparent and opaline diffusion bands. This process elegantly enriches the diffuser, but above all creates a non-glare diffusion of light along the cylindrical body.

Zephyr is a contemporary interpretation of the traditional chandelier: the craftsmanship of glass combines with the simplicity of the form and optical flair to reinterpret glass-working technologies not only as decorative elements, but also as functional tools for controlling and distributing light.

FEATURES

- Product Code: **1783040A**
- Colour: **Bronze**
- Installation: **Suspension**
- Series: **Design Collection**
- design by: **Carlo Colombo**

DIMENSIONS

- Height: **1885 mm**
- Diameter: **1094 mm**
- Max Height from ceiling: **2000 mm**
